Living Music Box...

Is the registered name
of our genuine

Geisler-Rollers

(U. S. Patent No. 50853)

the most wonderful trained singing Canary in the world, the bird you have heard so much talk about. This strain of Rollers is especially bred for us over in Germany, and is absolutely unobtainable from other dealers.

Beware of Imitators

In order to protect ourselves and our patrons, we have registered in the Patent Office of the United States our Geisler-Roller Canaries, under the name of "**Living Music Box.**" This name must be stamped on the inside wing of each bird as well as on its shipping cage.

None Genuine Without This Stamp

If you are looking for something extra fine in the line of Canaries, order one of these birds and you will never regret it. Thousands of unsolicited testimonials from all parts of the United States and foreign countries on hand. Write for our booklet, "The Living Music Box," and Testimonial Sheet. It is free for the asking.

ANNOUNCEMENT

SEASON 1924-1925

All Prices Subject to Change Without Notice

IN PRESENTING herewith our new catalogue to our patrons we wish to express the desire that it may fulfill the purpose for which it has been written, namely, in assisting you to make a selection of an article which will give entire satisfaction and at the same time be a credit to our house. It will show you in word and picture a line of goods which will always be appreciated by everyone, young or old, man or woman, and not being expensive it will also be within the reach of everyone. Our quotations are F. O. B. Omaha, or F. O. B. New York City, and the lowest for first-class stock. Our aim has always been to give entire satisfaction to our customers, and to judge from the thousands of unsolicited, sometimes very flattering letters from our patrons from all parts of the U. S., Canada, Mexico and other foreign countries, we believe that we have been very successful in our efforts.

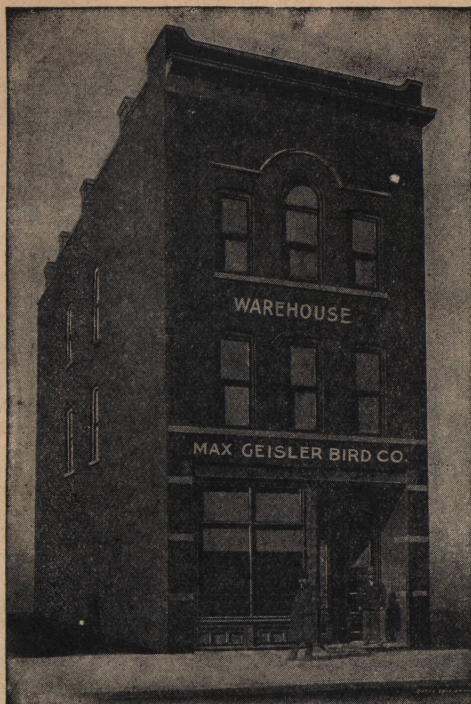

Every single bird, fish, etc., is carefully inspected before packed and not forwarded unless in perfect, sound and healthy condition. All goods are shipped at buyer's risk, but our approved method of packing entitles us to assert that we can ship birds, etc., any distance in the United States, Canada and Mexico with **perfect safety**. Losses, if any, we always try to adjust to the entire satisfaction of our patrons. We save our customers unnecessary express charges by forwarding at the lowest rate, in extra light shipping cages, etc., which we do not make any charge for, but we expect the same to be **returned immediately**, free of all charges. Express charges for returning empties are only 15 cents per cage, if returned by the same company that forwarded it. Although our terms are cash with order, we will, if preferred, **send goods C. O. D.** if enough money accompanies the order to cover express charges both ways. The best method of sending money is by Express, Postal Money Order or Bank Draft; for small amounts up to \$1.00, postage stamps (wrapped in wax paper) will be accepted, but **never send personal checks**, as this causes delay of order and an additional expense of 15c, which is charged by banks for exchange.

One more **very important word**: Every business no matter what kind, requires some confidence from its patrons, but none to such an extent as the dealing in birds and other live stock, and we are sorry to admit the fact that many bird dealers, in fact the greater majority, are taking advantage of this by sending their customers **inferior stock**, which, as they very well know, would otherwise soon die and be a loss on their own hands or they will sell you a **"trapped"** parrot, which will never learn to talk, as a **"hand raised"** one, guaranteeing him as a **"good talker,"** or birds which never sing as **"good singers,"** or females for males, etc. Therefore be careful who you are dealing with, and only trust your order in someone's hands who is worthy of your confidence; only order of an **established firm**, whose long existence in business gives you a security that you will be treated right and honestly. We **guarantee our stock to be as represented**, or money will be **refunded**. We have no agent or agencies, but our seed, food and medicines may be procured from any reliable druggist or grocer in U. S. or Canada. (See page 48.)

The fact that we have been in business here in Omaha for the past 36 years and the many entirely unsolicited testimonials given here in this book and on separate sheet, of which the original, besides thousands of others can be seen by calling at our office, may assure you that we are worthy of your confidence.

MAX GEISLER BIRD CO.

References: Any Express Company or U. S. National Bank of Omaha.

OUR NEW WAREHOUSE.

All four floors of the entire building are occupied exclusively by our mail order business. The shipping department as well as the department for preparing and putting up our large variety of foods, seeds, medicines, etc., have been transferred to this building.

Our mail order business has so enormously increased that we could not handle it any longer at our old quarters. We have therefore purchased our own building as shown in cut opposite, located at 108 So. 11th street, within 3 blocks to all Express offices. We will be able now to fill orders very promptly and as this building is very light and roomy and equipped by us with the latest sanitary improvements, and all the birds, etc., are kept in very large aviaries, we are in a position to ship the birds and animals in excellent, healthy condition, a great advantage over our competitors who as a rule are always crowded for room.

Max Geisler

Prop. Max Geisler Bird Company

TESTIMONIALS

We give below a few unsolicited testimonials received from our patrons from all over the United States. These will show you that our stock as well as our method of doing business, always gives entire satisfaction. Thousands of similar letters on file:

Rev. E. Musial, Wheeling, W. Va., writes: "The India Shama Thrush arrived lusty and happy. He is at the present time singing with all his might. I am much satisfied with him and would not give him away for double the price I paid for him."

Miss R. Saleb, Schuyler, Neb., writes: "I received the Fox Terrier. He is the best dog in Schuyler and everybody thinks so."

Miss Clara B. Cragg, Howard, Kas., writes: "The Hartz Mountain Canary arrived in good condition and commenced singing right away. He is a little beauty and a good singer. I am well pleased with bird and cage, as both are very pretty."

J. A. Lu Maye, Green Bay, Wis., writes: "The two White Java Canaries received, and will say that I thank you very much for sending me such a pretty pair."

Mrs. E. M. Hamilton, 458 Pollock Avenue, New Castle, Pa., writes: "I received the Mocking and Redbirds and am very well pleased with them. The Redbird is grand, whistling all the time."

John B. Dreibelbis, North Liberty, Ind., writes: "The Australian Shell Paroquets I received last Friday, the 10th, were in good condition, but somewhat scared. I wish to thank you for the nice selection you made for me."

Nicholas Klein, of North Platte, Neb., writes: "The Mockingbird you sold me turned out to be a fine singer, as you guaranteed. You can challenge the world on the qualifications of that bird and you will not lose your money. He is simply a 'joe Dandy.' Thank you. I have had good birds from New Orleans and even Colorado, but I have no kick coming."

Jennie Hesler, Veedersburg, Ind., writes: "Received Silk-poodle all right and we are delighted with him. He is a very active little fellow."

C. F. Reynolds, of Denny, writes: "I am much pleased with the St. Bernard Dog and would not take \$200 for him."

Mrs. Sam Boxwell, Herrington, Kas., writes: "I received the monkey, and I must say that I am very much pleased with your way of filling my order, for I could not have done so well myself. The monkey is well and happy. Accept my thanks."

Mrs. M. Donovan, of Victor, Col., writes: Just received the Chinese Nightingales and am very proud of them. They are beautiful and the only ones in the district."

D. W. Gantlet, Sudbury, Ont., writes: "The Panama Parrot that I got from you has done well. I enclose a list of what he can say: 'Hello!' 'What?' 'Yes,' 'Ralph' (my young son's name); 'Take care,' 'Go on out,' 'Hello, Polly,' 'Hello, Pedro,' 'Hello, Polly, you talk well,' 'Hello, Pedro, you talk well,' 'How do you do' (in several different tones), 'How do you do, Polly,' 'How do you do, Pedro,' 'Quite well,' 'Peek-a-boo,' 'Shake hands,' 'Shake hands, Polly,' 'Shake hands Pedro,' 'Shake hands, Pedro, now, now, now, now,' 'Polly wants a cracker,' 'Polly wants it,' 'Polly whacker,' 'Tra-la-la' (in singing tone), 'Shut up,' 'Good-bye,' laughs with different expressions, whistles, etc."

F. W. Maage, Honolulu, Oahn Hawaii, writes: "I received my polly a few days ago in very good condition, considering the long journey, etc."

James M. Hill, D. D. S., Gettysburg, Pa., writes: "I will cheerfully testify to the strictly honorable and generous manner in which you fulfilled your promises in dealing with me."

TALKING PARROTS

THE HUMAN TALKER

We make a specialty of young, hand-raised Mexican Parrots, which we import in large quantities direct from Mexico, and which we therefore are able to sell at a lower price than any other dealer in the United States, considering quality. We give a written guarantee with every young Parrot to learn to talk within six months; and in case of failure (which hardly ever happens) we agree to exchange without any extra charge. If you intend to buy a good Parrot, in fact, the best in existence, we advise you to order a young hand-raised, "Mexican Double Yellow-headed Parrot," also called "The Human Talker," because he imitates the human voice to perfection, and his talking ability is unlimited. He can also be easily taught to sing and whistle. He is considered among bird fanciers as the best talker in the world, and in fact there is none

better. If you want to buy a cheap Parrot, we can recommend either a young, hand-raised "Mexican Red-headed" Parrot, which kind is especially noted as becoming great pets, or a "Pine Island" Parrot. When ordering a Parrot be sure to order at the same time a supply of seed and food. In case you cannot obtain same in your town, if you will send us the name of a reliable druggist we will see if we can make arrangements with him to carry our preparations in stock. Full directions how to take care of, feed and train a young Parrot, will be sent with every bird. Directions for the care of grown Parrots will be found printed on the back of our Parrot Seed boxes, and also on page 56 of this catalogue.

A Few Letters Showing How Well Our Patrons Are Pleased With Our "Human Talker."

T. A. Burford, of Thacker, Mingo Co., West Va., writes: "The Double Yellow-head Parrot I had from you fifteen months ago is a perfect beauty and can distinctly say over one hundred words, being only eighteen months old now. I intend getting another one. Send prices."

Mrs. J. G. Pyle, Dallas, Texas, writes: "I have thought for some time that I would write you how well pleased I am with the 'Polly' you sent me about a year ago. She is not only one of the greatest talkers I ever heard, but also a most beautiful bird. I have had numbers of people tell me that they certainly intended giving you an order for a fine Polly, as my bird has been a splendid advertisement for your store. Polly is almost one and one-half years old, and has been talking over a year. She learned very rapidly and these are some of her sentences: 'Ha, ha, ha! I thought I would die;' 'Kitty, kitty, come on, Kitty Gray! Meaow!' 'Bye-bye;' 'Come on, Polly, let's go;' 'Howdy, Polly, howdy' (gives her foot with this); 'Scratch my little cocoanut.' She also call the 'pup' in a very natural voice and whistles for him. She can crow like a 'rooster' and calls the names

of my two daughters, also says 'Papa' and calls me 'Mrs. Pyle.' She calls herself 'Pretty Polly' and sings a song that she makes up all the words, 'Polly, darling.' She also smacks her beak and says 'Give me a kiss,' 'Kiss me, Polly.' Of course she says 'Polly wants a cracker,' and pities herself, 'Poor little Polly' when very hungry. When we call her she answers, 'What?' and when the phone rings she says 'Hello!' 'Go back' and 'Hurry up,' besides 'Good morning' and 'Good night, Polly,' are also some of her prattle. She is not satisfied with such a list of words but often joins in our conversation and makes up such a string of talk that we have to laugh. She never forgets anything and learns all the time, and is a constant pleasure. I want to thank you for your kindness in sending such a fine bird to me, and shall certainly always recommend your store very highly."

F. E. Aldrich, 896 Clark Street, St. Paul, Minn., writes: "Regarding the 'Human Talker' you sent me, it is doing fine, not a rough feather on it; is not 5 months old and can say anything and knows what to say at the right time. The people here think for its age it is a wonder, and it does beat all of the oldest birds in the neighborhood."

A. E. Britsmann, Humboldt, Mich., writes: "Our 'Human Talker' is a dandy. Have refused \$100.00 for it, and the man never saw it, but he heard it talk one day from outside the house, and \$500.00 would not buy it, etc."

J. Engesather, Brocket, N. Dak., writes: "I will tell you about our parrot. He is a dandy. He sings, whistles and talks all the time. He says a great many things, the most common are 'Where is doctor,' 'Polly wants the doctor,' 'Where is papa?' 'Rubber!' 'Good morning,' 'Polly scratch her head,' 'Oh, such a pretty Polly.' In all he says about 100 different words. We would not part with him at any price."

Ask for the latest testimonials about our "Human Talker." They are printed on a separate sheet every season.

Prices below are for young, genuine hand-raised Parrots in perfect, healthy condition. Talking quality guaranteed.

OUR SPECIALTY

"THE HUMAN TALKER"

Our Own Special Imported and Selected Genuine Mexican
Double Yellow Headed Parrots.

Their talking ability is unlimited. They are large sized birds of a beautiful bright green plumage, with red tipped wings, red and blue feathers in wings and tail and yellow forehead. Our prices are as follows:

Ordinary Double Yellow-heads—during July and August..\$18.00

Later in the season price averages from \$20.00 to \$25.00.

King Double Yellow-heads—during July and August....\$20.00

Later in the season they are very scarce and price averages \$25.00.

King Double Yellow-heads are a choice selection of Mexican Double Yellow-heads from the first breeding, which always contains the nicest plumage, healthiest and most intelligent birds. A King Double Yellow-head will always become an "Ideal Talker."

Mexican Red-headed Parrots—A fair talker, gentle disposition. Medium in size, nice green plumage with a bright red forehead, red and blue feathers in wings and tail.

Price during July and August.....\$ 8.50
Later in the season, \$10.00 to \$12.00.

Pine Island Parrots—A fair talker, easy to teach. Medium size, green plumage, each feather nicely black seamed, with bright red breast, red and blue feathers in wings and tail and white forehead.

Price during July and August.....\$ 8.50
Later in the season, \$10.00 to \$12.00.

Panama Parrots—As good a talker as the Double Yellow-head. Very large in size, bright green plumage; with red and blue feathers in wings and tail
.....\$25.00

African Gray Parrots—As good a talker as the Double Yellow-head. Large size, nice gray plumage, with bright red tail.....\$55.00

Single Yellow-headed Parrots—Good talkers. Medium in size, plumage same as Double Yellow-heads, only the yellow on top of head does not extend so far back\$18.00

Panama Parrot

Blue-fronted Amazon Parrots—Good fair talkers. Same size and plumage as Single Yellow-head, but blue instead of a yellow forehead\$20.00

IMPORTANT NOTICE

Above quotations are for **young hand-raised**, tame Parrots in first-class condition, most all already commencing to talk or talking a little.

We give a written guarantee with every young Parrot to learn to talk within six months.

We herewith beg to call to your attention the following:

There are two distinctions to be made in Parrots, namely: **hand-raised** and **trapped** Parrots. The first refers to **young** birds taken out of the nest and raised by hand (hand-raised). These will always learn to talk, will learn rapidly and easily and turn out excellent talkers; are tame and hardy. The latter refers to Parrots caught wild (trapped), which will never learn to talk, never get tame, and as a rule never do well in captivity for any length of time.

Remember, if you want a talker, always order a **hand-raised** bird.

There are sometimes Mexican Double Yellow-headed Parrots offered by unreliable dealers or peddlers as young hand-raised birds, warranted to talk, at prices which to furnish a hand-raised bird for is im-

possible. Of course those are **trapped** Parrots, generally very old and of no value whatever, as they will never learn to talk. We keep a few of them on hand merely to show the difference to our customers, and will also sell them, if desired, with a guarantee to talk, or exchange, but do not blame us if you have to exchange all your lifetime. Or again, a peddler will offer you a young bird resembling very much a Parrot, in size a little larger than a sparrow, claiming it to be just a very young genuine Mexican Parrot, while in fact it is only a Mexican Paroquet. Young Mexican Parrots, when they come on the market, are always as large as a common pigeon.

Our prices for Trapped Parrots are as follows:

Trapped Mexican Double Yellow-headed Parrots —Beautiful in Plumage. Young birds.....		\$6.00
Old birds		5.00

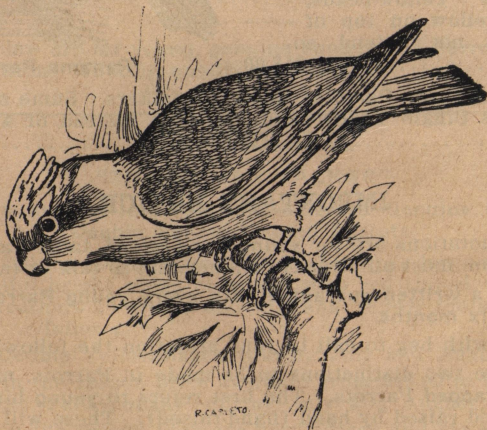

EDUCATED PARROTS

We always have a few already educated Parrots on hand, which average in price from \$20.00 to \$100.00, or more, according to kind and talking quality. Full particulars on application.

MACCAWS AND COCKATOOS

Maccaws are the largest Parrots known, with extra long tail feathers and beautiful colored plumage, and usually become good talkers.

Cockatoos belong also to the parrot family. They differ by being provided with a "crest," either short or long, which they erect when excited.

Rose-breasted Cockatoo

Red and Blue Maccaw.....	\$25.00 to \$50.00
Blue Maccaw	25.00 to 50.00
Rose-breasted Cockatoo	10.00
Large Yellow-crested Cockatoo.....	18.00
Small Yellow-crested Cockatoo.....	12.00
Leadbetter Cockatoo	30.00
Red-crested Manilla Cockatoo.....	35.00

PAROQUETS AND LORIES

FOR SUITABLE CAGES SEE NOS. 38 TO 52.

For shell Paroquets and Lovebirds only close wire cages will do. See Nos. 32, 49 to 52 and 72.

Some learn to talk a little and are otherwise very intelligent, great pets and beautifully plumaged. Most all kinds will also breed easily in captivity. Pair Australian Shell Paroquets

(Lovebirds)\$ 8.50

Yellow Shell Paroquets
(very rare) 12.00

Bee-Bee Paroquets..... 10.00

(nicely crested)..... 18.00

Australian Rosellas (beautifully plumaged) \$12.00 to 20.00

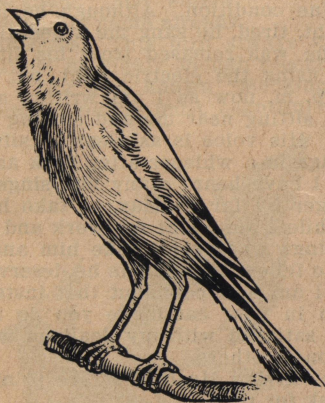

Blue Mountain Lories (most beautifully plumaged)..
.....\$20.00 to 25.00

Mexican Paroquets, each.. 4.50

Shell Paroquets With
Young One.

CANARIES

Music Box," U. S. Patent No. 50853. This registered name will be stamped on the inside wing of each Roller and also on his shipping cage, and is a surety to you that you have received a genuine Geisler-Roller.

The song of the Geisler-Roller is nothing but a stream of sweet music entirely different from the American canary and as it consists of trained notes, such as long, hollow rolls (from which this bird is named), trills, bell and nightingale notes, etc., which are produced with such a soft, melodious voice that it is really a pleasure to listen to such a little song wonder. While the sharp, shrill voice and short notes of the American Canary usually tires your ear, you will never

We are direct Importers of German Canaries—our European House being located in Hanover—Stromeyer St., Germany. We import in average about 100,000 Canaries every year, which we wholesale to other Bird Dealers except our special and registered strain of "Living Music Box." These birds are only obtainable direct from us as we do not sell these to other Dealers. This strain of Canaries is especially bred for us over in Germany and consists of the finest trained Rollers in existence. In order to protect ourselves and our patrons against imitators, we have registered in the patent office of the U. S. under the name of "Living

get tired listening to the beautiful notes of the Geisler-Roller. These birds are also trained to sing at night as long as the room is light. For full particulars write for our booklet, "The Living Music Box." It is free for the asking.

We Furnish a Written Guarantee with every Canary

Full and valuable directions how to feed and take proper care of Canaries will be found on the back of each package of our "Genuine Imported Andreasberg Roller Seed," and on page 55 of this catalogue.

**What Some of Our Patrons Have to Say About Our
"Living Music Box."**

Mrs. Geo. Spangler, 717 Mifflin Street, Lebanon, Pa., writes: "I have had birds sent to me from New York and Philadelphia, but none could equal the Geisler Roller. He is the sweetest-toned singer I ever heard and takes 40 seconds for him to complete one song. 'Max,' the pet of the household, has won our hearts and has proven to us all you represent him to be, and can conscientiously recommend your business to everybody."

Mrs. Lillian Hughes, of Bristol, Ind., writes: "My Geisler Roller arrived in fine condition December 7th, 2:30 p. m. Words are inadequate expressing my gratitude for sending such a beautiful singer. The same evening he entertained us with his quaint solos. The next morning, after a hearty breakfast and a good bath, he commenced singing in good earnest and won his way in our hearts, and held us captive by his lovely variation of trills. My advice would be to those that wish a fine singer, buy a Geisler Roller of Max Geisler, of Omaha, and have a bird worth having, a perfect music box."

Mrs. J. L. Dalals, of Burke, Idaho, writes: "Your Geisler Roller came on Xmas eve and arrived in fine condition. Although he had taken a long journey and was, no doubt, tired, he sang me a beautiful song within two hours or so after he was released from his little prison. When it was dark we were using the electric light, but he sang just the same. It is 8 o'clock p. m. now as I am writing and Max (that is what we named him) is sitting near me and singing all the time. His singing is just grand. His voice is as clear as silver chimes, and very soft. He almost sings in a whisper after dark as if he feared he would wake some one. I have heard many fine singers, but have never heard as good a singer by far as Max. I take him with me from one room to another while I am about my work and he is getting to be a regular pet. He sings wherever I take him and I could not begin to praise the dear little fellow as much as he deserves. I would not take \$20.00 for him, and I am now confident that instead of you praising the Roller too much in your catalogue you do not praise him enough. I am thoroughly satisfied with my dealings with you and will cheerfully recommend you to others."

The latest testimonials about our "Living Music-Box" are printed on a separate sheet every season. Ask for it.

CHOICE SONGSTERS

Under this class we give a variety of the best singing birds kept in captivity, and especially recommend the following four kinds, which we have always found to give good satisfaction, and which we usually keep in stock all the year around.

The "Chinese or Pekin Nightingale," a most beautiful plumaged, very active bird of the size of a canary and an excellent, fine singer, which his name already indicates. This bird always gives best satisfaction to everyone and cannot be highly enough recommended.

The well known "Mockingbird," also called "King of Song," on account of his most beautiful notes and great variety in his song.

Mockingbird

The "Red Cardinal," mostly called Redbird, but also known by the name of "Virginia Nightingale," and the "Brazilian or Gray Cardinal." Both birds bring in their song some very fine notes, something similar to a Nightingale. We always keep a good stock of these four kinds on hand, and therefore we are able to select some extra fine songsters.

For Suitable Cages See Nos. 38 to 48.

OTHER SINGING AND FANCY BIRDS

A collection of very handsome birds, mostly very small in size. They are easy to be taken care of and are very hardy. Most all will breed with good success, especially if kept in an aviary.

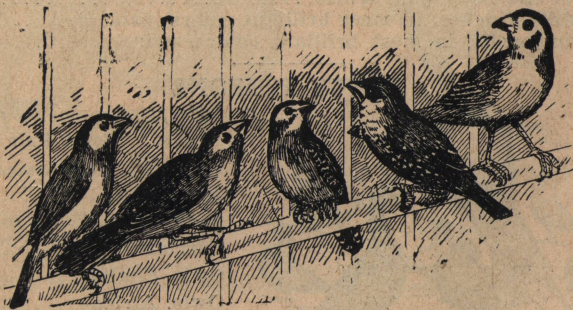

An aviary filled with a few pairs of the smallest, bright-colored red-billed Finches is the nicest attraction one can think of.

For Suitable Cages see Nos. 23 to 24, 30 to 32 and 49 to 52.

FANCY FISH

Japanese Fantail
Japanese Fringetail

German Goldfish

Japanese Comet
Chinese Telescope

Our specialties are Japanese and Chinese Goldfish, of which we only handle the **genuine imported** stock, short, egg-shaped body, good fins and tail, and brilliant colors. We ship fish with perfect safety by express, in properly fitted cans which we charge for from 15 cents to \$1.00, according to size, but agree to refund money if can is returned at once, express charges prepaid, which only costs 10 cents if returned by same company. When ordering Fish would advise you to send 40 cents extra for a box of my Prepared Fish Food and a bunch of Aquatic Plants. The first has printed directions on the care of Goldfish and the aquarium, the latter will save you the trouble of changing the water so often (read article on following page), and besides will beautify your aquarium very much, especially if the plants are attached to one of the nice aquarium ornaments offered on pages 20 to 22.

Mrs. C. E. Boyce, Ray, Kas., writes: "My fish arrived in good condition and I can truthfully say that I am more than pleased with the selection you gave me."

Mrs. Chas. Boganderz, Pellston, Mich., writes: "I am delighted with the fish, they are the finest I have ever seen. Many have already seen them and say the same."

AQUATIC PLANTS

It is impossible to keep Goldfish in good health any length of time without Aquatic Plants. Why? Simply because the fish absorb oxygen when breathing and when kept in an aquarium where no aquatic plants are grown they will soon have consumed all the oxygen contained in the water, and then they are forced to come to the surface in order to get

Potamogaton and Cabomba

oxygen out of the air. But as fish are not built to breathe through the air, their gills will soon become inflamed, thus causing the death of the fish. While on the other hand, Aquatic Plants by growing give oxygen to the water, thus supplying the fish with this life-giving element all the time. Of course the water could be changed frequently, which you would have to do, if you should not keep any Aquatic Plants, but to say nothing about all the trouble and inconvenience of changing water every day, Goldfish are naturally used to standing water, and therefore the constant changing will do them harm and you will never be able to keep Goldfish with good success.

Aquatic Plants, especially if attached to an aquarium ornament as offered on following pages, will also improve very much the good appearance of an aquarium or globe. One thus fixed up looks very handsome. Following are the most desirable plants for aquarium use, and will grow either floating or rooted in sand. They are thoroughly cultivated and excellent oxygenators.

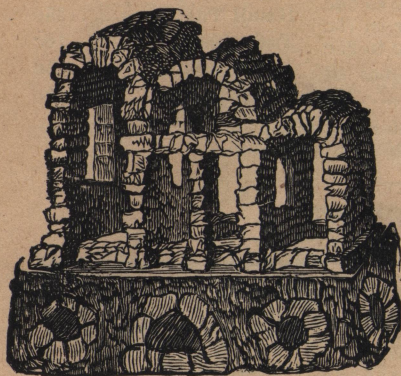

Prepaid by Mail.

Cabomba Palustris (like picture), bright green.....25c bunch
 Myriophyllum Spicatum (Water Milfoil) very handsome....25c bunch
 Lemna (Waterlily) grows floating on surface of water.....25c bunch

The following three kinds grow better if imbedded in soil or sand.

Vallisneria Spiralis, a grass-like plant, very effective.....35c bunch
 Potomogaton (like picture) very handsome plant.....35c bunch

MAX GEISLER BIRD CO., OMAHA, NEB.

A THING OF BEAUTY AND UTILITY

A health-promoting ornament, for the home; a business-attracting novelty for the merchant.

Combination fountain and aquarium set in a bed of flowers and plants mounted upon an artistic frame work. The fountain is kept active by a tiny pump for which the motive power is supplied by a spirit lamp or candle. The sprays shoot several feet high and keep a colored celluloid sphere in mid-air. The aquarium is octangle, of heavy glass set in zink, and large enough to permit a number of small fish, and other small water animals to disport themselves freely. The whole is strongly built and directly imported by us from Germany and is a fine piece of mechanical art work that will attract and hold attention wherever it is placed.

The constant motion of the life-giving stream for the fountain will tend to keep the air pure in the house. Price \$95.00.

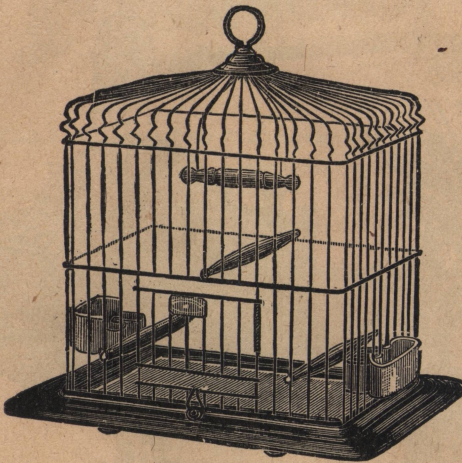

Parlor Fountain
Aquarium

44 inches high, 30 inches in
diameter, bronzed....\$48.00

CAGES

We make a specialty of Osborn, Hendryx and Lindemann cages, which have a reputation all over the United States as the most stylish and best finished Bird Cages manufactured. The material used is of high-grade quality; no poisonous oxides, or other matter injurious to birds enter into the construction of these Cages. The cross-bars of all Brass Cages are one solid piece of brass, which makes the Cage very durable and prevents it from losing its original shape. After being finished they are provided with a coat of very hard metal lacquer, which avoids all tarnishing. Directions how to clean are on every Cage, and by following same the cage will stay bright and new for years. NOTE:—Slight changes in style sometimes occur, to improve cage.

No. 10a, with drawer,
only

Material all brass.
Size $6\frac{3}{4} \times 9\frac{1}{4}$ in., $12\frac{1}{2}$
inches high.

This Cage is provided with a new patent drawer, like shown in cut, which saves taking off the bottom while cleaning it.

Brass Fender (see page 44) to fit these Cages,

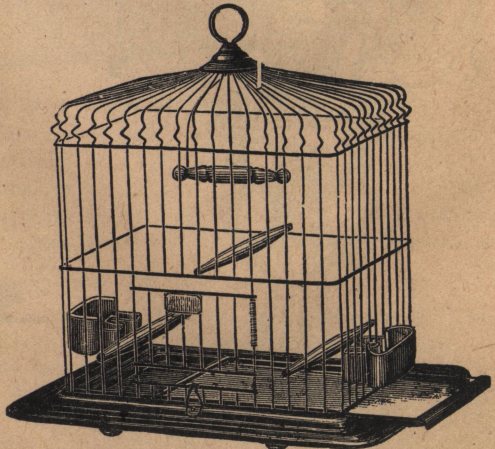

LEADERS

OUR LATEST STYLE BIRD CAGE

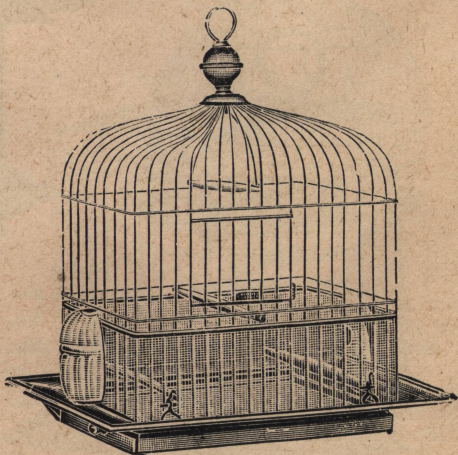

This is a new style made from solid brass with blue enameled zinc drawer and attached brass seed guard. It has the following advantages: the guard and the wide moulding bottom makes it absolutely impossible for the bird to scatter any seeds on the floor. The drawer will never rust, it is easily removable and makes it very handy to clean the cage. The shape of the cage is very graceful plain, but still stylish; it is an ornament for any room and on account of its cleanliness it can even be kept in the parlor. The cage is provided with a heavy metal lacquer which

prevents the brass from tarnishing and will keep it bright like new for years.

BIRD SEED, FOOD AND MEDICINE

See Testimonials on Pages 53 and 54.

We make a specialty of different kinds of Bird Food, Medicines and imported Bird Seed of best quality. The seed, being cleansed by machinery, is absolutely free of dust and dirt, and properly mixed, suitable for each particular kind of bird. We advise everyone loving his bird, not to buy any seed which is not put up by a well known Bird Fancier, as it requires long experience and study of the nature of birds in order to know what is becoming to them, and for this reason not everyone is able to put up proper seed. Our prices are not higher than common seed, and there is no reason why you should not buy the **best and healthiest** seed to be gotten for your bird, instead of the poor qualities put on the market under the common name of "Mixed Bird Seed," of which most of them are directly injurious to birds.

Our different kinds of seed and food are open to the market, and every package is **guaranteed**. We put them up in nice cartons and sell them to the trade at prices which allow the retail dealer handling them a fair profit. We advise all lovers of birds, if they don't find our preparations at their respective druggist or grocer, to request them to keep them in stock, and refuse all other mixtures offered to them as being "just as good." It will be to your own interest, because birds which are fed on seed and food put up by us will always stay in perfect health and good plumage, and if singers, full in song all the year round and will live much longer.

If our preparations are not handled in your town, you will oblige us by sending the names of a few reliable druggists, so we can make arrangements with one of them to carry a full line in stock.

Each Carton must bear this Registered Trade Mark:

None genuine without it.

MAX GEISLER BIRD CO., OMAHA, NEB.

NOTICE

Small shipments up to about 3 lbs. are cheaper by Parcel Post and charges must be **prepaid**, while heavier shipments are cheaper by Express and can be sent charges **collect**.

For instance, a 10-lb. package of Seed or Food costs by Express to New York or Philadelphia 37c; by Parcel Post 81c, to Chicago by Express 30c; by Parcel Post 43c.

INSURANCE AGAINST LOSS OR DAMAGE

Shipments by Parcel Post can be insured for 5 cents extra against loss, but never against damage. But, if you will send us 10 cents extra with your order, we will insure your Parcel Post shipments against loss as well as damage. Shipments by Express do not need any insurance for the reason that the express company is responsible for the loss or damage of the packages.

Prepaid

SOMETHING ABOUT SICK BIRDS

There are numerous bird medicines put up, generally under the name of "Bird Tonic," which are claimed to cure all diseases of Birds. People with common sense will admit that this is impossible.

We have put up special Tonics for each occasion and named them, respectively "Treatment A, B, C, D," etc.

It will be advisable for everyone who really loves his bird to keep a full line of these medicines on hand, for the sooner you treat a sick bird the more chance you have to cure him. Certain diseases if settled too far into the system become incurable. Follow this advice and it may probably be the cause of saving the life of your bird. If you should not be successful in treating your bird and you wish to correspond with us regarding him, we will be glad to advise you to the best of our ability free of charge, and if any special medicine is required we shall only charge for the same the actual cost, which will be from 15c to 50c. We have cured many hundreds of birds this way, and have saved many a one already given up by its owner.

When writing in regard to a sick bird, state the following: (a) Kind and age of bird. (b) What kind of seed or food you have been feeding him (mail a small sample of it if possible) and how you have been taking care of him. (c) Take the bird in your hand and examine if his breast is full and fleshy or if sharp and bony. (d) Describe the droppings, their color and condition, and send some of it, wrapped in wax paper with your letter. (e) State since when sick, and describe all visible symptoms of the disease. (f) State if cage is placed close to a window or not. We will answer by return mail and send full instructions for treatment, and will also send the proper medicine, if remittance accompanies letter.

One Warning: Among all diseases, the most met with in birds are those of the "Respiratory Organs." They are commonly known as "Colds." It is an old saying (and is still recommended by many bird dealers nowadays), that the removal of the horny scale which will form on the point of the tongue, by peeling or cutting off with a knife, will cure the disease. It should be hardly necessary to mention that this is only a cruel, unnecessary torture to the poor bird, as it is of no beneficial effect whatever. The dry, hard point of the tongue is natural, caused by the inner heat of the sick bird, and will disappear by itself as soon as the body has regained its normal temperature.

For birds which have lost their song from cold, over-singing or unfinished shedding, our Tonic A (Song Restorer), price 30c, prepaid 40c, and our "Song and Moulting Food," 15c, or 18c prepaid, will be a sure remedy.

What Our Patrons Have to Say About Our Bird Preparations

J. Kingman, of Grand Forks, Minn., writes: "Since I have been using your seed, Parrot spray and tonic my Polly has regained perfect health and plumage. You know this spring when I wrote you telling you of the terrible condition of my Poll, it is needless to again tell you how bad she was as no doubt you still have my letter. But if you haven't, she had picked every feather out with the exception of her head and a few on her wings and tail, but the rest of her body was as bare as your hand and one could see her entrails working through the skin on her stomach. Actually he was the fiercest sight you could imagine and be alive and really I only used your supplies, that is seed, spray and blood purifier about 10 days and she was full of pin feathers and in a months time or less you never could tell she had anything wrong and if anything she was more beautiful than ever."

Mrs. Laura Bullard, of Oregon City, Ore., writes: "Please find enclosed money order for 35 cents for which send me two cartons of your song and moulting food for canaries. Was given a sample by Mrs. Kirchem, a customer of yours, and my 12 year old canary has regained his song wonderfully."

Mrs. E. A. Graff, of Lima, O., writes: "The medicine has done wonders. My bird sings fine now for me. I am very much obliged for the trouble you have taken."

Mr. N. Klein, North Platte, Neb., writes: "Some time ago I wrote to you, saying that Jim (the mockingbird) was not doing well, and asked you, if you knew what to do for him. You recommend to try your 'Vegetable Extract' which I did, and with wonderful results. The bird is himself again and sings as loud as ever. Nothing like your 'Vegetable Extract' for bringing a bird to life again."

Mr. John Wallace, care of Wallace & Danner, Bearfoot, S. C., writes: "Enclosed find 35c for one bottle bird tonic treatment "A." (Song Restorer). I like to have it in the house, as I think it the finest thing I ever tried for canaries, etc."

Wm. H. Oliver, Lebanon, Pa., 309 Cumberland St., writes: "If owners of parrots around here would see the difference in the quality of your foods over other makers, why, any druggist could establish a trade for your goods, as I certainly would like it very much if he could be induced to handle them. I have found out the difference. We run out of your Prepared Parrot food, Sun Flower Seed, Mexican Nuts, etc., and I bought a box of a Philadelphia firm, and our parrot won't eat it."

Mrs. F. E. Ramsdell, of Laona, N. Y., writes: "Yours received this p. m. and many thanks for your advice. Find enclosed 35 cents for which send me another bottle of your Parrot Tonic. It is the best medicine I ever saw and I will never be without it as long as I have a parrot."

Etta Andrews, of Colwood, Mich., writes: "Since I have received the seed and bird biscuit my bird has begun to sing just fine, so will not need the restorer. While I sit writing this letter he has been singing the nicest I ever heard him sing since I had him. I will not use any other seed but yours after this."

Mrs. Arthur Harp of Chanute, Kan., says: "I received Tonic treatment A, and my birds are doing fine. They sing beautifully again."

Mrs. A. M. Casey, of St. Johns, N. Y., writes: "Thanks for the Treatment C, which you sent to my Roller. He does not cough any more and has sang several notes."

John A Bausman, of Lancaster, Pa., writes: "My parrot is much improved in health since we use your food sent me and he is improved in his talking also. We are delighted with the parrot."

James E. Symons, Leadville, Colo., writes: "Being a great bird fancier, I have used for some time your Andreasberg Roller seed and bird biscuit, and I find it is good to keep my birds in good health, etc."

Frederic M. Libby, Portland, Maine, writes: "Kindly send me word what it will cost for enough parrot biscuit to last him one year. It agrees with him better than any food he has ever eaten."

Mrs. A. B. Crocker, of Liberty, Neb., writes: "My bird sings fine again and is the admiration of everyone. My other bird has also quit shedding and is singing since taking your medicine."

H. G. Keeler, of Benedict, Neb., writes: "Yours just received. I think the Parrot is entirely well now. I gave your Parrot Tonic for several days and he seems quite lively now."

J. Metts, of Memphis, Tenn., writes: "Your bird food received and my birds have improved wonderfully since I have been using your food."

Mrs. Eva Holman, of 600 11th St., Bellingham, Wash., writes: "Please find enclosed \$1.00 for bird seed and German Bird Biscuit. My birds do not get along as well on what I get here as they did on your goods."

THE CANARY

Full Directions How to Feed and Take Care of Canaries

To keep canaries in perfect health and song it is absolutely necessary that the following instructions be strictly observed: Feed nothing but Geisler's Genuine "Roller" Seed, which are composed of the finest genuine Imported Summer Rape, with best quality Cicily Canary Seed and other seeds, scientifically mixed in the proper proportions to make a perfect balanced food. Too much stress cannot be laid on the importance of this point, for your Canary's voice as well as health depends on his food. The quality, purity, and cleanliness of the seed **especially the Rape Seed**, determine whether his voice will keep its soft, sweet quality, with a great variety of full melodious notes, or whether it will become harsh and loud and he will drop one note after another until he finally stops singing altogether. American and other Cheap Rape is directly harmful and dangerous. I import all my own seed and **absolutely guarantee** that this package contains the **best quality of Genuine Imported Summer Rape** which money can buy. **Test it for yourself**—chew a few of the Rape Seeds (they are the small dark seeds) and note their mild, rather sweet, very agreeable taste, the sign of good Rape. Then compare this with the sharp, tongue-burning, even bitter taste of the Rape from any ordinary bird seed.

Let the bird eat as much seed as he wants, and fill his cup after cleaning it thoroughly with fresh seed every morning. Give him one-eighth of a cake of "Max Geisler's Maizena Bird Biscuit" three times a week and one-half teaspoonful of "Max Geisler's Health Food for Canaries" once a week. On the alternate days give a little lettuce as long as obtainable, or in its place a piece of ripe apple or boiled carrot, a piece as large as a small walnut, but do not let any unconsumed pieces remain in the cage over night. Fresh, but not cold drinking water (same temperature as room is best) should be given every day after first cleaning the cup thoroughly. Let him have a bath during the summer daily and during the cold season (lukewarm) twice a week. Keep the bottom of the cage covered with "Max Geisler's Prepared Bird Gravel," which will not only keep his feet in good condition and prevent the bird from getting vermins, but it will also be beneficial for his digestion. Clean the cage at least twice a week. Have a piece of cuttlefish bone in the cage all the time. When the bird begins to shed feathers, give him daily on top of the seed one-half teaspoonful of "Max Geisler's Song and Moulting Food," and if you wish to assist your bird in getting through this critical period of a bird's life quickly and safely add to his drinking water "Max Geisler's Vegetable Extract" until he has finished his moult. Keep him in a room of as even tem-

perature as possible (68 to 70 degrees F). Never place your bird so he can see another one, especially not during the mating season (February to June) or else he will oversing himself, become hoarse and stop singing, which will also occur if you allow your bird to sing until late at night.

Never hang the cage above the gas, if any, and never too close to a fire, neither too close to a window, especially not in winter, as there is always more or less draught, which will cause your bird to lose his voice. Of course on warm, pleasant days during the summer you can hang his cage at the open window, providing there is no door or other window open on opposite side of the room, as this would cause draught, or you may even put him outside, if well protected from the wind. Let him have a sun bath for an hour every morning, but cover half of the cage so that he can move out of the sun if he wants to. A Roller, if in good condition, should be singing all the year around, except during the mounting season (July and August). Should he stop singing any length of time outside of the moulting season give him immediately "Max Geisler's Bird Tonic A" (Song Restorer) in his drinking water as per printed directions on the bottle. Should he act dumpish (feathers puffed up, appetite poor, etc.) use "Max Geisler's Bird Tonic D." It is advisable to have a bottle of each on hand all the time; it may save you a lot of trouble. By following these directions strictly you will be able to enjoy the song of your bird for many years.

Although "Max Geisler's Imported Roller Seed" is especially prepared for Andreasberg Roller Canaries, it can also be fed to any other kind of Canaries by making them gradually used to it, and by so doing you will soon note a wonderful improvement in your bird's voice.

THE PARROT

Full Directions, How to Feed and Take Care of Parrots

Of all Parrots kept in captivity, there will be, we claim, at least ninety out of every hundred which, regarding food, are treated entirely wrong. Not on account of carelessness of the owner, but simply because he does not know any better. As a rule a Parrot, when not fed properly, will take sick within a short time, but we also know cases where Parrots seemed to appear well for years, until all at once "Polly" was sick. Bowel troubles, which cause many Parrots' death, self-destroying of plumage by biting off feathers (caused by feeding bones, or potatoes with gravy, or other greasy and unnatural food), and other sicknesses will and are bound to show up sooner or later. Therefore, we earnestly warn all Parrot owners, if they did not take proper care of their pets so far, not to run any further risks by letting it go the old way; but to observe the following rules, which are given by a Bird Fancier of thirty years' experience, and which he has found to be the best to keep Parrots perfect in health and good in plumage all the time. It is just as much trouble to feed a Parrot right as it is to feed him wrong.

The principal food of a full-grown Parrot should be "SEED"—

MAX GEISLER BIRD CO., OMAHA, NEB.

best Russian Hemp, Russian Sunflower, Sicily Canary, Unhulled Rice, Mexican Black Corn and Nuts, of the very best quality, mixed in proper proportion, as contained in Max Geisler's "Mixed Parrot Seed." Fill the seed-cup with fresh seed every day and allow him to eat of it as much as he wants. Every morning let him have one-fourth cake (dry) of Max Geisler's "Parrot Biscuit." (One box will last one Parrot seven weeks.) This is very nourishing and healthy, because it contains ingredients that the Parrot get in his wild state. In the afternoon fill the other cup half with water, to which you have added some of Max Geisler's "Vegetable Extract," but never use ice cold water; boiled water of same temperature as room is best. Only leave the water in for ten minutes; this is sufficient. One-half hour later give in same cup, two teaspoonsfuls of Max Geisler's "Health Food" for Parrots (slightly moistened as per directions on box). Toward evening offer him another drink of water. Every other day give him some sweet, ripe fruit, such as apples, pears, bananas, etc., a piece as big as a small chicken egg. But if the bowels should become too loose stop feeding fruit for several days. Twice a week give a tablespoonful of Max Geisler's "Parrot Corn," once a week a small piece of Cuttlefish bone. Clean, dry gravel, free from dust, should be put in the bottom of the cage fresh every day. It will favor digestion and gives the Parrot a chance to clean his feet and plumage. Clean the cage every evening and remove all food over night. As Parrots very seldom go into a bathing dish, it is advisable to sprinkle him with lukewarm water about twice a week or oftener in summer, once every week in winter, but care should be taken that he can get dry afterwards in a warm place. If you add a few drops of Max Geisler's "Parrot Spray" to the water, it will keep his plumage in a beautiful condition all the year around. Keep the Parrot in a room of even temperature, where no draught will strike him; allow him during warm weather as much fresh air as possible, and give him once in a while a small branch of some kind of a fruit tree to gnaw on, which is very healthy.

Young Parrots require the same care, with the only difference that as long as they do not eat seed yet, they must have soft food, therefore they ought to get Max Geisler's "Prepared Food for Baby Parrots," mixed with a teaspoonful of Max Geisler's "Health Food" (soaked) twice a day, morning and afternoon, and in the time between our "Prepared Corn for Parrots," slightly boiled as per directions on box and mixed with "Health Food."

By following these rules your Parrot will remain in perfect health all the time and will repay your trouble by a nice appearance and better inclination to talk.

We especially warn against the old style of feeding Parrots, namely, "bread or crackers" soaked in coffee." This or any other "sop" is bound to derange the bowels, until the stomach becomes so weak that it cannot digest the food any more, besides the "cafein" contained in the coffee is poisonous.

THE MOCKING BIRD

Full Directions How to Feed and Take Care of Mocking Birds and Other Soft Billed Birds of Same Size

Take four heaping teaspoonfuls of "Max Geisler's Prepared Mocking Bird Food," which is about the right amount for one day's ration for a Mocking Bird or a bird of same size, and mix this with about two heaping teaspoonfuls of coarse, grated, raw carrot. If the carrot should be too juicy, use a little less; if too dry, a little more of it. To be right the food should be light and loose, therefore never squeeze it together when mixing, as this would make it bulky and unfit to eat. Always prepare each day's ration fresh, so as to prevent it from becoming sour. Every third day use as a change some grated hard boiled egg instead of the carrot, to mix with the food, and give on these days a small piece of lettuce between the wire of the cage, or if lettuce is not obtainable a small piece of ripe fruit, according to season. Occasionally add a few soaked currants or small raisins to the food. If you wish to keep your bird in excellent condition and in full song, you must give him a liberal supply of live meal worms daily. (We send 100 meal worms for 25c, postpaid.) Mocking Birds and birds of similar size should receive at least five to ten a day, but the double quantity during moulting season. When the bird is shedding feathers, give him in his drinking water "Max Geisler's Vegetable Extract," which will greatly assist him in going through this critical period of a bird's life with safety. Let the drinking water always be fresh, but never too cold. Give a fresh supply every day, during hot weather twice a day, and pay strict attention to the cleanliness of the cups, food as well as water cups. Allow him a bath every day or at least every other day during the warm season; and twice a week during the winter months. Use lukewarm water on chilly and cold days. Let the bird have as much fresh air as possible during warm weather, and always keep the cage in a very light place, in a room of even temperature 68 to 70 degrees F., well protected from draughts. Let him enjoy a sun bath for an hour during the forenoon, but have half of his cage shaded so he may move out of the sun at leisure. Never hang the cage during the winter months too close to the window, especially not over night. Keep the bottom of the cage well covered with "Max Geisler's Prepared Bird Gravel," which will not only keep his feet in good condition and prevent him from getting vermins, but will also be beneficial to his digestion. The cage of soft-billed birds should be cleaned every day. Never try to keep Mocking Birds in too small a cage, as they will never do well for any length of time. 12x20 inches and 18 inches height should be the smallest size. If the bird should appear dumpish (feathers puffed up, appetite poor), give without de-

lay for one time only, three meal worms dipped in olive oil, and in his drinking water "Max Geisler's Bird Tonic D." To have a bottle of the latter always on hand all the time, may save you a lot of trouble, probably the life of your pet.

THE NIGHTINGALE

And Other Soft Billed Birds of Same Size

Should receive the same care as described for the Mocking Bird, with the only difference that they must be fed on "Max Geisler's Prepared Nightingale Food."

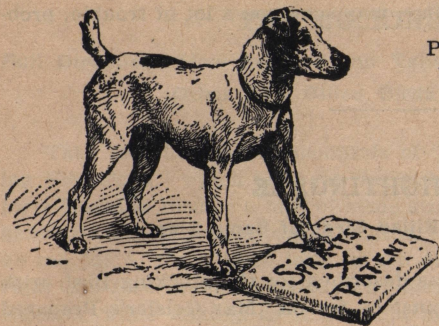

THE GOLDFISH

Goldfish should be fed once a day at a regular hour. The quantity given should not exceed what they will consume within ten minutes. You may count about one-eighth of a sheet for a fish of medium size. Once or twice a week they should be fed on Ant Eggs, of which this box contains a proportional quantity. Unconsumed food should be removed from the water as soon as possible.

Directions Regarding the Management of the Aquarium

Never overstock an Aquarium. Allow not more than two Goldfish, 2 to 3 inches in size, to each gallon of water, or less fish in average if same are larger. The best temperature for the water is about 60 degrees Fahrenheit. Never try to keep Goldfish without a sufficient quantity of Aquatic Plants. These, by growing, give "oxygen" to the water, a necessity for the good health of the fish. "Cabomba Palustris" is the best plant for this purpose. A bunch of it (25c prepaid by mail) is sufficient to keep the water for six medium fish in healthy condition. The water of an aquarium properly stocked with these plants would not need to be changed for months, while otherwise it requires changing every day in summer, or twice a week in winter. But always change immediately if the fish come frequently to the top of the water to breathe. If a Goldfish appears sickly place him for a minute or two in salt water to the strength of a heaping teaspoonful of salt to a quart of water, but remove immediately if he should turn on his side. Place the aquarium where the full light will strike it and have the bottom of it covered with coarse gravel.

DOG FOOD AND MEDICINE

**Spratt's Patent—Limited,
and "Milk Bone."**

Patent Meat "Filbrine" Vegetable Dog Cakes with Beetroot.

These celebrated Cakes are supplied to all the leading kennels, and are used at the principal Dog Shows all over the world.

TAXIDERMY IN ALL ITS BRANCHES

Birds and Animals Mounted by Expert Taxidermists

W. Bender, of Ida Grove, Ia., writes: "Owl received O. K. and everybody says it is the finest work they ever saw and I am well satisfied. Would not take \$10 for same."

R. M. Trumbull, of Hildreth, Neb., writes: "I send you by today's express box containing large white Crane for taxidermy. It is a very fine specimen, and I want it mounted in good style. You have been recommended to me as the best taxidermists in the state, so I send you the work." Later Mr. Trumbull again says: "I send you by today's express a fine specimen of Owl for taxidermy. Please mount it with wings half spread. You will remember mounting a large white Crane for me about a year ago. Your work on this was very satisfactory, and is highly commented upon by all who see it."

Our Specialty

Young Mexican Parrots

GENUINE HAND-RAISED NEST-BIRDS

Which we sell with a written guarantee to talk (read article on page 7).

We are direct importers, having an agency established in Mexico, and therefore we are able to offer the choicest Young Parrots at a much lower price than any other bird house in the United States.

Our Parrots have the advantage that their care and feeding is not left to ignorant Indians, but that they are fed right from the beginning, as soon as taken out of the nest, by experienced men under

Our New Improved Method of Feeding Young Parrots.

We are therefore able to turn out birds in surprisingly excellent healthy condition. During the season we sell:

Red-headed Parrots at only \$8.50

Double Yellow-headed Parrots.

"The Human Talker"

at only \$18.00

These prices are good only during the season, July, August.
See page 6 of this catalogue.

For full particulars about the Mexican Double Yellow-headed Parrot write for our booklet, "The Human Talker," and Testimonial Sheet. It is yours for the asking.
